Contents Volume 129

1 Rough sets theory for multicriteria decision analysis
S. Greco, B. Matarazzo and R. Slowinski

48 Fuzzy hierarchical analysis revisited
J.J. Buckley, T. Feuring and Y. Hayashi

65 Fuzzy linear programming based on statistical confidence interval and interval-valued fuzzy set
J. Chiang

87 Scheduling with target start times
J.A. Hoogeveen and S.L. van de Velde

95 Minimizing mean squared deviation of completion times with maximum tardiness constraint
J.H. Seo, C.-B. Kim and D.H. Lee

105 Heuristics for determining economic processing rates in a flexible manufacturing system
M.S. Sodhi, B.F. Lamond, A. Gautier and M. Noël

116 Cooperative dispatching – exploiting the flexibility of an FMS by means of incremental optimization
R.W. Seifert and S. Morito

134 A global supply chain model with transfer pricing and transportation cost allocation
C.J. Vidal and M. Goetschalckx

159 Technology acquisition with technological progress: effects of expectations, rivalry and uncertainty
A. Rahman and R. Loulou

186 Assortment planning in fashion retailing: methodology, application and analysis
K. Rajaram

209 Basket problems in margin calculation: Modelling and algorithms
A.E. Fiterman and V.G. Timkovsky

224 A note on scheduling flowshops with flexible stage ordering
C. Koulamas and G.J. Kyparisis

231 Editorial: Special millennium issue of the EJOR: A global view of industrial logistics
L.L. Barros, D. Brown and M. Riley

235 Multicriteria decision making on maintenance: Spares and contracts planning
A. Teixeira de Almeida

242 A combinatorial approach to level of repair analysis
L. Barros and M. Riley

252 Selective maintenance for support equipment involving multiple maintenance actions
C.R. Cassady, W.P. Murdock Jr and E.A. Pohl

259 On the optimization of supply chain networking decisions
S. Lakhal, A. Martel, O. Kettani and M. Oral

PII: S0377-2217(00)00315-5

271 Analysis of supplier buyer relationships using resource constrained project scheduling strategies
O.I. Tukel and S.N. Wasti
277 Coordinating supply chain inventories through common replenishment epochs
S. Viswanathan and R. Piplani
287 A continuous model for production–distribution system design
A. Dasci and V. Verter
299 Impacts of inventory shortage policies on transportation requirements in two-stage distribution systems
J. Geunes and A.Z. Zeng
311 Heuristics for assessing emergency transshipments
P.T. Evers
317 An extended enterprise planning methodology for the discrete manufacturing industry
F. Frederix
326 Workload balancing and loop layout in the design of a flexible manufacturing system
C.N. Potts and J.D. Whitehead
337 Competition in a deregulated air transportation market
N. Adler
346 A neural network model for enhanced operation of midblock signalled pedestrian crossings
G. Lyons, J. Hunt and F. McLeod
355 Iron ore production scheduling to improve product quality
J.E. Everett
362 Inventory, transportation, service quality and the location of distribution centers
L.K. Nozick and M.A. Turnquist
372 Multiperson decision-making based on multiplicative preference relations
F. Herrera, E. Herrera-Viedma and F. Chiclana
386 On computational methods for solutions of multiobjective linear production programming games
I. Nishizaki and M. Sakawa
414 Firms' R&D decisions under incomplete information
V.A. Grishagin, Ya.D. Sergeyev and D.B. Silipo
434 Efficiency measurement in the stochastic frontier model
J. Ondrich and J. Ruggiero
443 Super-efficiency and DEA sensitivity analysis
J. Zhu
456 Technical note on the paper "An empirical study of a new metaheuristic for the traveling salesman problem" (by Shigeru Tsubakitani, James R. Evans, European Journal of Operational Research 104 (1998) 113–128)
C. Rego
461 Static competitive facility location: An overview of optimisation approaches
F. Plastria
471 Budgeting with bounded multiple-choice constraints
D. Pisinger
481 Capacitated facility location/network design problems
S. Melkote and M.S. Daskin
496 A sales forecasting system based on fuzzy neural network with initial weights generated by genetic algorithm
R.J. Kuo
518 A time-integrated Richardson model
Á. Péntek, J.B. Kadtke, M.F. Sulcoski and L.D. Miller

539 The two-group heuristic to solve the multi-product, economic lot sizing and scheduling problem in flow shops
J. Ouenniche and F.F. Boctor
555 Construction heuristics for the asymmetric TSP
F. Glover, G. Gutin, A. Yeo and A. Zverovich
569 On the convergence of multiattribute weighting methods
M. Pöyhönen and R.P. Hämäläinen
586 Generation of efficient frontiers in multi-objective optimization problems by generalized data envelopment analysis
Y.B. Yun, H. Nakayama, T. Tanino and M. Arakawa
596 A Shapley function on a class of cooperative fuzzy games
M. Tsurumi, T. Tanino and M. Inuiguchi
619 Controlling multi-reservoir systems
T.W. Archibald, C.S. Buchanan, L.C. Thomas and K.I.M. McKinnon
627 Towards a conceptual structure for evaluating policy analytic activities
W.A.H. Thissen and P.G.J. Twaalfhoven
650 Optimizing the system of virtual paths by tabu search
C.-C. Shyur and U.-P. Wen
663 A general model for consecutive-k-out-of-n: F repairable system with exponential distribution and $(k-1)$-step Markov dependence
Y. Lam and H.K.T. Ng
683 C_{pk} index estimation using fuzzy numbers
H.T. Lee
689 Contents Volume 129
